SUBJECT INDEX

Abstracts 109, 264, 420, 592
Acute viral hepatitis in Thailand, a clinical study, 69
A. lumbricoides, treatment with pyrantel pamoate, 362
Amoebic granuloma of the colon, a histopathologic study 34
Ancylol-disophenol in *G. spinigerum* infection in cats 359
Ancylostoma canium, experimental infection in dogs 534
Angiostrongylus cantonensis from giant African snail 523
Angiostrongylus malaysiensis 527
Anopheles minimus flavirostris, studies on the gonotrophic cycle 384
Anti-poliomyelitis campaign in Taiwan, 140
Australia antigen detection by E.O.D. 486

Babesia gibsoni: influence of infection on serum enzymes of dogs, 297
Bacterial enteric pathogens: *V. parahaemolyticus* and *Y. enterocolitica* 337
Balantidium from man, electron microscopic study 1
Blood volume changes in *falciparum* malaria 344
Breinlia sergenti, electron microscopic observations 462
Brugia malayi in Southern Thailand 44
Brugia malayi in West Malaysia 503

Changes in blood volume in *falciparum* malaria 344
Clinical trial of Jonit in hookworm disease 51
Coccidian parasites in lesser mouse-deer 441, 444
Combantrin in treatment of *A. lumbricoides* 362
Control of *S. spindale* by trematode antagonism 237
Courses at the National Centres 125, 436, 605
Culex pipiens fatigans breeding sites in Rangoon 474
Culex pipiens fatigans, studies on cytoplasmic incompatibility 469

Dengue viruses in LLC-MK_2 cell culture 147
Detection of Australia antigen by E.O.D. 486
Dicrofilaria immitis, testing with Fenthion 466
Dysentery, water borne in Hong Kong 180

Editorial i
Edwardsiella tarda and *Entamoeba histolytica* 186
Eimeria traguli, sporogony 444
Election microscopy on development of *Breinlia sergenti* 462
Electro osmodiffusion for detection of Australia antigen 486
Electrophoretic study of *Trichomonas vaginalis* amylase 308
Entamoeba histolytica cyst passers, treatment with metronidazole 29
Epidemiological study of *S. japonica* in Laos 365
Evaluation of massive gastrointestinal bleeding 65
Experimental cholera, electron microscopy 322

Factors affecting riboflavin status in Thai children 552
Fansidar, in treatment of malaria 164
Fenthion against *Dicrofilaria immitis* 466
Fibrinogen metabolism in *P. coatneyi* infected monkeys 455
Filariasis due to *B. malayi* in Malaysia 503
Filariasis in the Seychelles islands 222

Genetic red cell abnormalities in W. Malaysia 133
Gnathostoma spinigerum chemotherapy in cats 359

Helminthic infections, survey in Singapore 190
Helminths, soil-transmitted in Kuala Lumpur 196
Hookworm infection, treatment with Jonit 51
Human *vibrio cholerae:* A histologic review 73

Infantile diarrhoea in Indonesia 249
Insecticides for the control of the house fly 244
Intestinal parasitism in S. Vietnam 25
Iron kinetics in hookworm infection 201
Isolation of *Toxoplasma gondii* from guinea pigs 292
Isospora hylomysis and *Eimeria bentongi* 289

Jonit in hookworm infection 51

Laboratory Demonstrations 84, 406, 575
Laboratory patterns of Typhoid fever 174
Leptospirosis in febrile patients in Djakarta 493
Leptospiral serotypes in S. Vietnam 313
Leptospiral study on F.U.O. in the Philippines 153
Leptospirosis in the Philippines, studies on horses 151
Leptospirosis in South Sumatra 22
Leptospirosis in wild mammals 496

Madurella grisea, cause of Maduromycosis 17
Maduromycosis in the Philippines 17
Malaria suppression and prophylaxis with Fansidar 164
Microsporidia in snails 380
Mosquitoes of Chagos Achipelago 483
Musca domestica, prevalence in Kuala Lumpur 548

Nematode parasites from Malaysian rats 516
News of SEAMEO - TROPMED Project 112, 270, 424, 594
Nutritional anaemias in Filipinos during pregnancy 564

P. falciparum malaria, treatment with Fansidar, 39
Plague meningitis in infants, 403
Plaque formation of Dengue viruses in LLC-MK_2 cells, 147
Plasma amino acids in kwashiorkor and marasmus, 399
Prevalence of housefly in Kuala Lumpur 548
Primate Trypanosomiasis in Japan 453
Pyrantel pamoate in *A. lumbricoides* infection 362

Red cell abnormalities in Malaysia, 133
Riboflavin status in Thai children, study on diet 552
Research Notes, 256, 590
Rhinosporidium seeberi, ultrastructure and life history 9

Schistosomiasis japonica, epidemiological survey in Laos 365
Schistosoma spindale control by trematode antagonism 237
Serum vitamin B_{12} level in liver diseases, 375
Soil-transmitted helminths in Malaysia, 196
Studies on gonotrophic cycle of *An. flaviostris* 384
Studies on iron metabolism in experimental hookworm infection 201
Studies on the pathogenicity of *Vibrio parahaemolyticus*, 169

Tanqua tiara, intestinal epithelium ultrastructure studies, 351
Transmission of microsporidian infection in snails 380
Trichomonas vaginalis amylase 308
Typhoid fever, current laboratory patterns 174

Ultrastructure of *Tanqua tiara* epithelium 351
Ultrastructure of *Rhinosporidium seeberi* 9
Venomous snakes in Southeast Asia 56
Vibrio cholerae in the Philippines 73
Vibrio parahaemolyticus, studies on pathogenicity 169
Vibrio parahaemolyticus and *Yersinia enterolitica* 337
Vitamin B_{12} in Liver diseases 375
Water-borne dysentery in Hong Kong 180
Yersinia enterolitica, a new bacteria enteric pathogen 337

EDITORIAL NOTICE

The Southeast Asian Journal of Tropical Medicine and Public Health, the official organ of the Central Coordinating Board for Tropical Medicine and Public Health (CCB-TMPH) of the Southeast Asia Ministers of Education Organization (SEAMEO) publishes articles on Parasitology, Tropical Medicine and Public Health. The Editorial Board welcomes contributions in the form of original papers, reviews, research notes, preliminary and shortcommunications and correspondence on subjects of interest in this Region. Papers will be considered for publication provided they have not been published elsewhere, or if they have, written permission has been obtained from the Editor for their reproduction. They will be subject to editorial revision. Manuscripts and other correspondence in connection with the Journal including requests for reprints etc. should be sent to the Editorial Secretary, Southeast Asian Journal of Tropical Medicine and Public Health, 420/6 Rajvithi Road, Bangkok 4, Thailand.

Papers should be written in English and should be submitted in duplicate, typed on one side of quarto paper in double-spacing throughout (including tables, footnotes, legends for illustrations and references), with a left-hand margin of 4 cm. Manuscripts should include the title of the paper, initials and name(s) of the author(s), name of the institution where the work was carried out and a short title to be used as a running title. Introduction, materials and methods, results, discussion, summary, acknowledgements and references should follow. Grant acknowledgements may appear at the beginning of the text. Manuscript pages should be numbered.

References to literature cited should have the authors name and date in parentheses in the text and at the end should include, in order; authors' name (s), date, title of paper, journal title (abbreviated according to World Medical Periodicals, 3rd Ed.), volume and first page number. Unpublished data or personal communications are not to be included in the "References", but may be cited in the text.

Illustrations and diagrams should be larger than the finished block, to allow for reduction. If illustrations are to be reproduced in the original size, this should be indicated. Maximum page size is 14 × 20 cm. Two sets of illustrations or diagrams should be submitted, each on a separate sheet bearing the authors' names, short title of the paper and figure number on the back. They should be referred to as figures and given arabic numbers. Legends and captions should be typed on a separate sheet and numbered correspondingly. Diagrams should be drawn in India ink on plain white paper, Bristol board or blue graph paper, and should be submitted in the original or as a glossy photograph. Lettering should be up to draughtsman's standards, photographs should be glossy prints of high quality and should include a statement of magnification or include a ruler marked in cms and mms or a scale showing microns. Each should be identified in pencil on the back. The top should be marked with an arrow. Colour illustrations are entirely at authors' expense.

Except for the simple ones tables should be in the form of photographs on glossy paper suitable for reproduction, and given arabic numbers. Their approximate position in the text should be indicated. They should carry headings describing their content and be comprehensible without reference to the text. Cost of number of tables and figures in excess of four will be charged to the author.

Each senior author will be entitled to receive 50 free copies or reprints of the paper which appears in the journal but additional copies may be obtained at nominal rates.

To meet part of the cost of publication and to enable distribution of copies at subsidised rated rates so that it will have a wide clientelle, the CCB-TMPH has decided to offer Advertisement facilities to commercial firms, druggists and their agents at the rate of US$ 250 per page per year (4 issues) or US$ 70 per page per issue in black and white. Blocks will have to be provided by the Firms concerned. Colour plates will entail additional charges for blocks and for printing, The rate for the cover pages are : Back cover (outer page) US$ 400 per year; Back cover (inner page) US$ 320 per year. No advertising will be interleaved with the text.

All requests for insertions of advertisement should be sent together with the remittance to Secretary-General, Central Coordinating Board for Tropical Medicine and Public Health, 420/6 Rajvithi Road, Bangkok 4, Thailand.
